Dear Ms Houston:

This office has recently been contacted by a resident of Riverside Gardens advising of serious medical problems. The resident's private physician referred her to a specialist in occupational medicine with emphasis on chemical exposure.

Needless to say, this development has caused a great deal of concern to the individual as well as all residents of Riverside Gardens.

It is my understanding that your officials/testers were at the residence located at 4423 Wilshire Avenue on January 15th and 29th, 1986.

It is urgently requested that you advise my office of the findings of these most recent tests at your earliest possible convenience.

Sincerely,

Darryl T. Owens
Jefferson County Commissioner
